MCCD V2.0 Cad Converter

Scope

MCCD-V2.0 CAD Converter is a desktop and web-based application for field sales agents to assemble the different components into a unit and convert into an AutoCAD drawing.

Functionality

MCCD-V2.0 application provides the flexibility for the sales person to customize the components of an Air handler into one single unit. This application should contain all the Auto CAD diagrams of an Air handler in the database.

This application provides the flexibility for the sales person to choose a particular Category, Subcategory, Component along with their customized Size and Dimension and put it on to the Panel on a mouse click. This Panel called as “Assembly Screen”, helps to view all the Auto CAD drawings and place them accordingly. On click of “ConvertToCAD” button, the customized static Auto CAD drawings on the Panel are converted into dynamic Auto CAD drawings in a single Auto CAD file. This Auto CAD drawings can be edited, printed and then can be sent for Manufacturing/Production.
